

# MANN-FILTER

## Product Information

No. 147  
08/10/2018

### Doubled due to great demand: HU 711/6 z and HU 7044 z

The vehicle applications of HU 711/6 z are widespread. That's why MANN-FILTER now launches an additional oil filter element:

Alternatively to the well-known HU 711/6 z, these vehicles can now also be equipped with the new HU 7044 z.

Existing  
oil filter element  
HU 711/6 z

Alternative  
oil filter element  
HU 7044 z

### What's the difference between the two oil filter elements?

The two elements differ in the manufacturing process and the sealing concept. Whilst HU 711/6 z has foil end-discs, the new HU 7044 z features welded plastic end-discs.

Be aware!

No difference though in filtration performance. Both elements are tested and released according to the respective specification.

Please use our filter elements as listed in our MANN-FILTER catalogues.

**Drive safely with MANN-FILTER – with HU 711/6 z or HU 7044 z!**
